- MongoDb
- Rest Client
- APIs and RESTful services
- HTML 5
- CSS 3

- Javascript
.

SKILLS

- Agile Methodology
- Problem solving
- Strong communication skill
- Attention to details
- Fast Learner

PROJECTS

BUZZPAY(in-progress)

A microservice fintech application that came to life with the recent cash crunch in Nigeria in mind where users can register as an individual or as a merchant(business owners with CAC), users can deposit, transfer, receive money, as well as payments. Transactions within can be done by scanning QR codes, or by normal transfer or USSD(Post MVP).

MoneyWay

A financial application where users closely monitor and manage their financial spending. can save, transfer, buy airtime, make utility payments from their
wallets and also fund your wallet through flutterwave.
Technologies Used: Intellij, Postman, Postgres, Spring boot, github, docker and flutterwave.

Oakland E-commerce App

Oakland is an e-commerce website application for furniture. Here furniture is displayed by the client and sold to consumers. The client can carry out CRUD operations of products and payment can be processed using Paystack payment.

Technologies Used: Intellij, Swagger, Postgresql, Spring Boot, github, Docker and Paystack.

Naijagigs4u

This product is a multi-service rendering market-place webApp, where Users will be able to browse through and find desirable and needed skills/workers available to book for their services, make payment and have the services rendered to them.

Technologies Used: Intellij, Swagger, Postgresql, Spring Boot, github, Docker and Paystack.
